Q. So you assumed a growth in the traffic going to 2020? A. That's correct. That's how the typical traffic study is done, the traffic impact study is done based on typical growth in the area. Q. A. Signal adjusted, but it's not going

Q. And how will the adjustment of the

9 Westbound-LTR is left through and right. And then, northbound-L is northbound left, and 10 northbound-TR is northbound through and right. 11 SB is -- SB-L is southbound left turn, and so 12 13

14 So during the 20 -- I thought you were going to say something. 15

on.

16

During the 2020 weekday street peak hour, that's the p.m. peak hour, the level of 17 18 service for the northbound left turn goes from C to F.

19 20 NJDOT has a -- has the criteria --21 I forgot the section, they have a section somewhere, which we used in 2007 as well, but 22 23 now, of course, we use the updated one, the 2018 -- I think the 2018, I forgot the actual 24 25 year, but I think it's the latest one that we 18

use for the NJDOT criteria on delay and for level of service.

So, based on that, we mitigated 3 4 that northbound left turn, and at the same time, when we mitigated it, we got to see that the 5 other movements don't suffer, because if the 6 other movements suffer, then, again, we have to 7 apply the NJDOT criteria to that. 8 9 So the mitigation that we

10 recommended was to provide a leading green phase 11 for all the northbound movements and the 12 eastbound right turns with a green time of 9 13 seconds. It's shown in the table, Table 2 of page 13.

And then, at the same time, reduce 16 the northbound/southbound green time from 60 seconds to 54 seconds, and reduce the 17 18 eastbound/westbound green time from 18 seconds 19 to 15 seconds.

However, I want to mention that

22 adjusted in the controller, because this 23 happens -- this situation happens only, like,

21 this signal timing is not going to be physically

24 what did we say, five times -- four or five

25 times a year. So this would be achieved by the

And is it your proffer, on behalf of your client, that, on those eight holidays, they rise to the level of being major traffic holidays, and requiring police assistance, if and only if those dates fall on a weekday? MR. COSTA: That's correct, if they	5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	I would I will do that, I guess, with I'm trying to determine whether I want to why don't I do that now with Rao Chava, and then we'll come back to Umesh, in terms of MR. WARNER: You heard him, chair. CHAIRMAN SWEENEY: Before we do that, I want to go back to January 8th. That was the day that you were present and took traffic counts that you used as a representative special event day. MR. AVADHANI: That's correct. COMMISSIONER WEIDELI: Were there police officers assisting with traffic on January 8th? MR. AVADHANI: On January 8th? MR. COSTA: Let me just clarify something: That holiday, in 2018, fell on December 18th. MR. AVADHANI: On a Tuesday.

1	Tuesday. It was a weekday.	1	MR. CHAVA: That's right.
2	MR. COSTA: Right, it was a weekday,	2	MR. COSTA: and just go through
3	but it wasn't January 8th. I just want you to	3	that information in that report.
4	know it wasn't January 8th.	4	So let's start with
5	This is a representation of 2019	5	CHAIRMAN SWEENEY: Mr. Costa, hold
6	holidays. So I just want to	6	on. I would prefer to finish up with the traffic
7	CHAIRMAN SWEENEY: It doesn't matter	7	study before we go to the traffic management
8	what the exact day was, to tell you the truth.	8	report, because I think that report is based on
9	MR. COSTA: Yeah, I know. I just	9	the traffic study, was it not?
10	want to be clear.	10	MR. COSTA: They're based on each
11	CHAIRMAN SWEENEY: What I want to	11	other, but I'm I can do that as well.
12	know is, was there were there police present	12	CHAIRMAN SWEENEY: Yeah, I mean,
13	providing traffic assistance on the day the	13	we've got Mr. Avadhani here to talk about his
14	special event day you were there	14	traffic study. Let's do that first, and then
15	MR. AVADHANI: I understood. Yes.	15	let's pick up with the traffic management. Okay?
16	CHAIRMAN SWEENEY: There were?	16	MR. COSTA: Okay.
17	MR. AVADHANI: There were.	17	CHAIRMAN SWEENEY: We've already
18	CHAIRMAN SWEENEY: Okay. So they	18	begun Mr. Avadhani on the traffic count analysis;
19	were there on a weekday. Is that correct?	19	please continue.
20	MR. AVADHANI: Correct.	20	MR. AVADHANI: Okay. Where did we
21	MR. COSTA: Correct.	21	stop?
22	CHAIRMAN SWEENEY: Okay. And how	22	CHAIRMAN SWEENEY: Wait a minute.
23	would you compare, in terms of traffic volumes	23	While you're thinking about where you want to
24	that day, with New Year's Day.	24	start, let me ask another question or two.
25	MR. AVADHANI: With that day and New	25	I don't quite understand the
	30		32
1	Year's Day? New Year's Day is higher than on a	1	proposed mitigation measures. What exactly does

3	CHAIRMAN SWEENEY: How much higher?	3	northbound movements and eastbound Balaji Drive
4	MR. AVADHANI: How much higher? I	4	right turns, with a green time of what does
5	think I would actually expect the temple	5	that mean?
6	management to address that, because	6	MR. AVADHANI: Typically, when
7	CHAIRMAN SWEENEY: You were going to	7	you're driving an intersection, you see
8	ask Mr. Chava to come up? Maybe he can answer	8	northbound and southbound, they go together, or
9	your question on this issue as well.	9	eastbound/westbound, they go at the same time. CHAIRMAN SWEENEY: Meaning the green
10	MR. COSTA: Correct.	10	· · · · · · · · · · · · · · · · · · ·
11	And on New Year's Day, just to set the groundwork for that the worshippers do not	11 12	lights go at the same time. MR. AVADHANI: Correct, green lights
12	come into the temple grounds, they park off site	13	turn on at the same time.
13	and are bused on, which I think we've testified	14	I don't know if you've seen
14 15	to.	15	sometimes, there's a sign we put on the traffic
l	MR. WARNER: And just for the	16	signal pole saying "Delayed Green." That
16 17	record, Mr. Chava, you recognize you remain under	17	"Delayed Green" means the opposing traffic will

19	MR. CHAVA: Yes.	19	in our case here, the northbound will go first,
20	MR. WARNER: Thank you. Please	20	and then the southbound will go at the same time
21	proceed well, you may want to wait for a	21	as northbound/southbound together. That's what

16	MR. AVADHANI: Correct.	16	CHAIRMAN SWEENEY: Maybe.
17	CHAIRMAN SWEENEY: Okay, Talk to me	17	MR. AVADHANI: I think it goes 15
18	a little bit about the 2020 build, the delay in seconds for the northbound left turn, 145	18	miles per hour. I could be wrong.
19 20	·	19	CHAIRMAN SWEENEY: Did you get the

22			MR. COSTA: Rao, do you know the
23	CHAIRMAN SWEENEY: Is that right? MR. AVADHANI: That's correct.	22	speed limits on the temple grounds.
24	CHAIRMAN SWEENEY: How does that	24	MR. CHAVA: Within the temple, it's about 5 miles.
25	how does that delay develop, if, in fact, people	25

3	MR. AVADHANI: They turn left into	3	CHAIRMAN SWEENEY: Is that going to

	MR. AVADHANI: So they will be	6	· - · · · · - · · · · - · · · · · · · ·
7	MR. AVADHANI: So they will be	6	202/206, wanting to make a left-hand turn,
7 8	waiting there to make that left turn. So that is	7	202/206, wanting to make a left-hand turn, they're approaching that intersection at 50 miles
8	waiting there to make that left turn. So that is 145 seconds delay. The traffic will back up on	7 8	202/206, wanting to make a left-hand turn, they're approaching that intersection at 50 miles an hour. Once they make that left-hand turn,
8 9	waiting there to make that left turn. So that is 145 seconds delay. The traffic will back up on the left turn lane. So to alleviate that, we're	7 8 9	202/206, wanting to make a left-hand turn, they're approaching that intersection at 50 miles an hour. Once they make that left-hand turn, they've got to slow down to 5 miles an hour.
8 9 10	waiting there to make that left turn. So that is 145 seconds delay. The traffic will back up on the left turn lane. So to alleviate that, we're going to have the traffic cop to let them keep	7 8 9	202/206, wanting to make a left-hand turn, they're approaching that intersection at 50 miles an hour. Once they make that left-hand turn, they've got to slow down to 5 miles an hour. MR. AVADHANI: Correct.
8 9 10 11	waiting there to make that left turn. So that is 145 seconds delay. The traffic will back up on the left turn lane. So to alleviate that, we're going to have the traffic cop to let them keep moving.	7 8 9 10 11	202/206, wanting to make a left-hand turn, they're approaching that intersection at 50 miles an hour. Once they make that left-hand turn, they've got to slow down to 5 miles an hour. MR. AVADHANI: Correct. CHAIRMAN SWEENEY: In my mind, that
8 9 10	waiting there to make that left turn. So that is 145 seconds delay. The traffic will back up on the left turn lane. So to alleviate that, we're going to have the traffic cop to let them keep moving. CHAIRMAN SWEENEY: Okay. So with	7 8 9 10 11 12	202/206, wanting to make a left-hand turn, they're approaching that intersection at 50 miles an hour. Once they make that left-hand turn, they've got to slow down to 5 miles an hour. MR. AVADHANI: Correct. CHAIRMAN SWEENEY: In my mind, that creates a situation where you've got people
8 9 10 11 12	waiting there to make that left turn. So that is 145 seconds delay. The traffic will back up on the left turn lane. So to alleviate that, we're going to have the traffic cop to let them keep moving. CHAIRMAN SWEENEY: Okay. So with the traffic cop allowing the northbound traffic	7 8 9 10 11 12	202/206, wanting to make a left-hand turn, they're approaching that intersection at 50 miles an hour. Once they make that left-hand turn, they've got to slow down to 5 miles an hour. MR. AVADHANI: Correct. CHAIRMAN SWEENEY: In my mind, that creates a situation where you've got people approaching the intersection at a much greater
8 9 10 11 12 13	waiting there to make that left turn. So that is 145 seconds delay. The traffic will back up on the left turn lane. So to alleviate that, we're going to have the traffic cop to let them keep moving. CHAIRMAN SWEENEY: Okay. So with the traffic cop allowing the northbound traffic to turn while he's halting the southbound	7 8 9 10 11 12 13	202/206, wanting to make a left-hand turn, they're approaching that intersection at 50 miles an hour. Once they make that left-hand turn, they've got to slow down to 5 miles an hour. MR. AVADHANI: Correct. CHAIRMAN SWEENEY: In my mind, that creates a situation where you've got people approaching the intersection at a much greater speed than they're actually clearing the
8 9 10 11 12 13	waiting there to make that left turn. So that is 145 seconds delay. The traffic will back up on the left turn lane. So to alleviate that, we're going to have the traffic cop to let them keep moving. CHAIRMAN SWEENEY: Okay. So with the traffic cop allowing the northbound traffic to turn while he's halting the southbound traffic, you reduce that delay down to 36	7 8 9 10 11 12 13 14	202/206, wanting to make a left-hand turn, they're approaching that intersection at 50 miles an hour. Once they make that left-hand turn, they've got to slow down to 5 miles an hour. MR. AVADHANI: Correct. CHAIRMAN SWEENEY: In my mind, that creates a situation where you've got people approaching the intersection at a much greater speed than they're actually clearing the intersection after they make the left-hand turn.
8 9 10 11 12 13 14 15	waiting there to make that left turn. So that is 145 seconds delay. The traffic will back up on the left turn lane. So to alleviate that, we're going to have the traffic cop to let them keep moving. CHAIRMAN SWEENEY: Okay. So with the traffic cop allowing the northbound traffic to turn while he's halting the southbound	7 8 9 10 11 12 13 14 15	202/206, wanting to make a left-hand turn, they're approaching that intersection at 50 miles an hour. Once they make that left-hand turn, they've got to slow down to 5 miles an hour. MR. AVADHANI: Correct. CHAIRMAN SWEENEY: In my mind, that creates a situation where you've got people approaching the intersection at a much greater speed than they're actually clearing the intersection after they make the left-hand turn. Why isn't that going to create a long delay at
8 9 10 11 12 13 14 15 16	waiting there to make that left turn. So that is 145 seconds delay. The traffic will back up on the left turn lane. So to alleviate that, we're going to have the traffic cop to let them keep moving. CHAIRMAN SWEENEY: Okay. So with the traffic cop allowing the northbound traffic to turn while he's halting the southbound traffic, you reduce that delay down to 36 seconds. Correct? MR. AVADHANI: That's correct.	7 8 9 10 11 12 13 14 15 16	202/206, wanting to make a left-hand turn, they're approaching that intersection at 50 miles an hour. Once they make that left-hand turn, they've got to slow down to 5 miles an hour. MR. AVADHANI: Correct. CHAIRMAN SWEENEY: In my mind, that creates a situation where you've got people approaching the intersection at a much greater speed than they're actually clearing the intersection after they make the left-hand turn. Why isn't that going to create a long delay at the traffic light?
8 9 10 11 12 13 14 15 16 17	waiting there to make that left turn. So that is 145 seconds delay. The traffic will back up on the left turn lane. So to alleviate that, we're going to have the traffic cop to let them keep moving. CHAIRMAN SWEENEY: Okay. So with the traffic cop allowing the northbound traffic to turn while he's halting the southbound traffic, you reduce that delay down to 36 seconds. Correct? MR. AVADHANI: That's correct. CHAIRMAN SWEENEY: And for those 36	7 8 9 10 11 12 13 14 15 16 17	202/206, wanting to make a left-hand turn, they're approaching that intersection at 50 miles an hour. Once they make that left-hand turn, they've got to slow down to 5 miles an hour. MR. AVADHANI: Correct. CHAIRMAN SWEENEY: In my mind, that creates a situation where you've got people approaching the intersection at a much greater speed than they're actually clearing the intersection after they make the left-hand turn. Why isn't that going to create a long delay at the traffic light? MR. AVADHANI: It will not be a long
8 9 10 11 12 13 14 15 16 17	waiting there to make that left turn. So that is 145 seconds delay. The traffic will back up on the left turn lane. So to alleviate that, we're going to have the traffic cop to let them keep moving. CHAIRMAN SWEENEY: Okay. So with the traffic cop allowing the northbound traffic to turn while he's halting the southbound traffic, you reduce that delay down to 36 seconds. Correct? MR. AVADHANI: That's correct.	7 8 9 10 11 12 13 14 15 16	202/206, wanting to make a left-hand turn, they're approaching that intersection at 50 miles an hour. Once they make that left-hand turn, they've got to slow down to 5 miles an hour. MR. AVADHANI: Correct. CHAIRMAN SWEENEY: In my mind, that creates a situation where you've got people approaching the intersection at a much greater speed than they're actually clearing the intersection after they make the left-hand turn. Why isn't that going to create a long delay at the traffic light? MR. AVADHANI: It will not be a long delay at the traffic light, because there are two
8 9 10 11 12 13 14 15 16 17 18 19	waiting there to make that left turn. So that is 145 seconds delay. The traffic will back up on the left turn lane. So to alleviate that, we're going to have the traffic cop to let them keep moving. CHAIRMAN SWEENEY: Okay. So with the traffic cop allowing the northbound traffic to turn while he's halting the southbound traffic, you reduce that delay down to 36 seconds. Correct? MR. AVADHANI: That's correct. CHAIRMAN SWEENEY: And for those 36 seconds, people will be queueing behind whoever's	7 8 9 10 11 12 13 14 15 16 17 18	202/206, wanting to make a left-hand turn, they're approaching that intersection at 50 miles an hour. Once they make that left-hand turn, they've got to slow down to 5 miles an hour. MR. AVADHANI: Correct. CHAIRMAN SWEENEY: In my mind, that creates a situation where you've got people approaching the intersection at a much greater speed than they're actually clearing the intersection after they make the left-hand turn. Why isn't that going to create a long delay at the traffic light? MR. AVADHANI: It will not be a long delay at the traffic light, because there are two lanes going into the temple driveway. So the
8 9 10 11 12 13 14 15 16 17 18 19 20	waiting there to make that left turn. So that is 145 seconds delay. The traffic will back up on the left turn lane. So to alleviate that, we're going to have the traffic cop to let them keep moving. CHAIRMAN SWEENEY: Okay. So with the traffic cop allowing the northbound traffic to turn while he's halting the southbound traffic, you reduce that delay down to 36 seconds. Correct? MR. AVADHANI: That's correct. CHAIRMAN SWEENEY: And for those 36 seconds, people will be queueing behind whoever's in first first in line to make that left-hand	7 8 9 10 11 12 13 14 15 16 17 18 19 20	202/206, wanting to make a left-hand turn, they're approaching that intersection at 50 miles an hour. Once they make that left-hand turn, they've got to slow down to 5 miles an hour. MR. AVADHANI: Correct. CHAIRMAN SWEENEY: In my mind, that creates a situation where you've got people approaching the intersection at a much greater speed than they're actually clearing the intersection after they make the left-hand turn. Why isn't that going to create a long delay at the traffic light? MR. AVADHANI: It will not be a long delay at the traffic light, because there are two lanes going into the temple driveway. So the traffic can dissipate on two lanes. They'll keep
8 9 10 11 12 13 14 15 16 17 18 19 20 21	waiting there to make that left turn. So that is 145 seconds delay. The traffic will back up on the left turn lane. So to alleviate that, we're going to have the traffic cop to let them keep moving. CHAIRMAN SWEENEY: Okay. So with the traffic cop allowing the northbound traffic to turn while he's halting the southbound traffic, you reduce that delay down to 36 seconds. Correct? MR. AVADHANI: That's correct. CHAIRMAN SWEENEY: And for those 36 seconds, people will be queueing behind whoever's in first first in line to make that left-hand turn?	7 8 9 10 11 12 13 14 15 16 17 18 19 20 21	202/206, wanting to make a left-hand turn, they're approaching that intersection at 50 miles an hour. CHAIRMAN SWEENEY: In my mind, that creates a situation where you've got people approaching the intersection at a much greater speed than they're actually clearing the intersection after they make the left-hand turn. Why isn't that going to create a long delay at the traffic light? MR. AVADHANI: It will not be a long delay at the traffic light, because there are two lanes going into the temple driveway. So the
8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	waiting there to make that left turn. So that is 145 seconds delay. The traffic will back up on the left turn lane. So to alleviate that, we're going to have the traffic cop to let them keep moving. CHAIRMAN SWEENEY: Okay. So with the traffic cop allowing the northbound traffic to turn while he's halting the southbound traffic, you reduce that delay down to 36 seconds. Correct? MR. AVADHANI: That's correct. CHAIRMAN SWEENEY: And for those 36 seconds, people will be queueing behind whoever's in first first in line to make that left-hand turn? MR. January 1st, you have buses coming in, and no one

43 1 is allowed to go in and park. So why would there be such a big line near the temple when people are supposed to go someplace else, catch the bus, and then come in? `That's what I understand for January 1st, they're supposed to take a bus. 6 MR. AVADHANI: January 1st, yes, 7 they will -- all the traffic's supposed to go to Sanofi parking lot, which you are aware. COMMISSIONER AMIN: So how do you 9 have traffic near the temple if people are 10 11 supposed to go and take a bus from off-street 12 parking, Sanofi? 13 MR. AVADHANI: Unless the northbound 14 traffic is going past the temple, they go to the 15 Sanofi lot. COMMISSIONER AMIN: So you're saying 16 that all the traffic that was built up on that 17 day was all the way from Sanofi parking lot to Foothill Road? Is that how I'm understanding it? 19 MR. AVADHANI: No, Brown Road -- you 20 21 said from 202/206 to Foothill -- or Brown Road. 22 Correct? CHAIRMAN SWEENEY: From Brown to 23 24 Foothill Road, traffic -- I could have walked 25 faster than I drove. 44 COMMISSIONER AMIN: I'm a little bit confused, because people are not supposed to go into the temple parking lot; they're supposed to go to the Sanofi parking lot, and take a bus, and then come in to the temple. So that's how I visualized it. MR. AVADHANI: That's correct. COMMISSIONER AMIN: For the cars that are backed up, from there, up to that point,

7 8 10 Brown Road, what exactly were they doing at that point? That's the question I have. 11 MR. COSTA: And we don't have an 12 13 analysis on that day. We don't know when this 14 backup was. We don't know how long it was. You 15 may know that, but we don't --COMMISSIONER AMIN: Maybe the backup 16

or something else? CHAIRMAN SWEENEY: There was no 20 accident. MR. COSTA: But we don't have -- I

was some other reason? Maybe there was accident

22 mean, we just don't -- I don't have the specifics 23 on that backup.

traffic is worse than all the others. Okay? What have you done, if anything, to 2 3 try to take into account how these traffic counts may change going forward? And I'm not talking about the 1 percent of your growth that you've 5 built in. I appreciate that, I'm glad you did that, but I'm talking about the additional 7 buildings that are planned or are in the discussion stages for 202/206 that could literally add 10s of thousands of people going in 10 and out. You know, there's the COE right next 11 door to you, Center of Excellence right next door 12 to the temple. We don't know what's going to 13 happen that, it's up in the air, but, literally, 14 they're talking about 400 apartment units, a 15 humongous shopping store, a hotel, retail 16 outlets. It sounds like a lot of traffic, which 17 is why people are concerned. 18 I would suspect that's going to have 19 an impact on the traffic in front of the temple 20 as well. What about the mosque that -- the land 21 is being cleared as we speak just a little ways 22 further south on 202/206. I assume that's going 23 to bring additional traffic to the --24 MR, COSTA: I just want to --25

CHAIRMAN SWEENEY: What about the 1 Insmed building, which has just been renovated 2 and added to, and has not yet had people move in? 3 I mean, there are a lot of other --4 MR. AVADHANI: Background traffic --5 CHAIRMAN SWEENEY: -- developments 6 going on within a couple of miles of the temple 7 that sound as though they're going to have a big impact on future traffic. Have you tried to take 10 any of that into account, other than your 1 percent assumed growth in traffic volumes? 11 MR. COSTA: I just want to make a 12 legal statement: That's off-site traffic 13 conditions which do not yet exist. My client is 14 not responsible for those. We're willing to talk 15 to you about them, but they don't exist; they're 16 not in place. 17 The Advanced Reality development has 18 not been approved, it's been stalled for some 19 period of time. So we don't know what's going 20

51 and we're actually pulling traffic off the road. 2 So we don't think that we can, sort of, take this 3 from what about the mosque, what about the next thing, what about the next thing. That's an unfair thing to put on this small religious 6 group. 7 I also think that it's unfair, to put upon this religious group, a different 8 standard of carpooling than to put on other 9 religious groups. 10 So I just want to lay out those two 11 legal issues, and just stick to the traffic. I 12 don't mind him discussing those issues, but I 13 think it's important that there's a lot of things 14 15 being heaped onto my client at this point that I think are unfair regarding other Bridgewater 16 17 Township traffic conditions that are well beyond the scope of this application. 18 19 MR. WARNER: Mr. Chairman, if I may 20 CHAIRMAN SWEENEY: Before counsel 21 jumps in -- no, I'm going to say something. 22 23 That's fine, I get it. I understand. I just want to make sure that we all 24 understand as well that this doesn't take into 52 account any of the additional traffic that these other developments may produce. And you don't have to do that, but let's understand what it 3 accounts for and what it doesn't account for. 4 5 MR. WARNER: With respect to the 6 legal issues, which are important to address immediately, the -- number one, nobody is 7 applying a different standard for traffic 8 purposes, or any purposes, to this use, from any other use. There's no -- that is not happening 10 at all. There was a suggestion with respect to 11 12 mitigation, and a request to see if there's 13 anything that the applicant themselves could do 14 to help mitigate a traffic situation. That's 15 something that's asked of every applicant, with 16 respect to every use that comes before this board and every board. No different whatsoever than 17 any other use and any other applicant, number 18 19 one. Number two, if I understand 20 correctly -- and I'll -- and I'm interested, 21

2	Let's get his input into how we may be able to	2	CHAIRMAN SWEENEY: Where is that off
3	use the garage, if it's approved and built, along	3	site?
4	with I don't know what else, to really address	4	MR. CHAVA: Right now, Advanced

6	on January 1, if you're living on one of the side	6	MR. AVADHANI: Advanced Reality,
7	streets off of 202/206, one of the streets that	7	right now.
8	has no access other than via 202/206, you can't	8	CHAIRMAN SWEENEY: So you would
9	get in or out. That's a public safety hazard.	9	still if, in fact, the garage fills up, and
10	Let's address that.	10	all of the other on-site spots fill up, you would
11	MR. COSTA: I think that that's I	11	direct people to Advanced Reality, or wherever?
12	mean, we can certainly stipulate to that. I	12	Would you have busing set up at that point? I
13	don't know the solution at this point, but we can	13	would think that's something you would have to do
14	certainly stipulate to working with the township	14	in advance.
15	to reach a solution.	15	MR. AVADHANI: We as from what I
16	CHAIRMAN SWEENEY: Good.	16	understand from the temple management is that we
17	MR. AVADHANI: We could do that.	17	do not anticipate that it will go beyond the
18	CHAIRMAN SWEENEY: Good.	18	1,000 spaces, because, so far, we have not
19	Anything else you'd like to present,	19	experienced that, other than New Year's.
20	Mr. Avadhani, either about your original report	20	CHAIRMAN SWEENEY: Just because you
21	or the traffic management plan?	21	don't anticipate it, doesn't mean it's not going
22	MR. AVADHANI: I don't have any more	22	to happen, and you've got to plan for those
23	to present, unless you have any questions.	23	circumstances. That's my question. How are you
24	CHAIRMAN SWEENEY: Okay. I've got a	24	going to deal with that? If it happens. If it
25	couple of other questions.	25	happens
	62		64
1	MR. AVADHANI: Sure.	1	MR. COSTA: We could certainly
2	CHAIRMAN SWEENEY: What's going to	2	correct me if I'm wrong they could certainly
3	happen on a day when I think I think you've	3	arrange for busing to one of the sites that are
4	said that the max number of parking spaces you'd	4	nearby. Advanced Reality may not be may not
5	require, or historically would have required, is	5	be available long term, but some of the other
6	about 900. Is that right?	6	sites, Brown Road school.
7	MR. AVADHANI: Correct.	7	MR. CHAVA: Brown Road school is
8	CHAIRMAN SWEENEY: And with the	8	the
9	parking garage, you're a thousand, give or take.	9	MR. WARNER: Is that Hillside
10	MR. AVADHANI: 1,047, yeah.	10	Elementary School?
11	CHAIRMAN SWEENEY: Okay, What	11	MR. AVADHANI: Yeah, the Hillside
12	happens if there's a demand for parking on site	12	Elementary School.
13	even with the garage? What do you do with the	13	MR. COSTA: So there would be other
14	overflow? Where do they go?	14	options
15	MR. AVADHANI: The overflow will go	15	MR. WARNER: Can you plan but you
16	back to what is it the Brown Road school,	16	would need some lead time to plan for busing, is
17	you said?	17	the chairman's assumption, and I suspect that's
18	MR. CHAVA: We're not expecting	18	an accurate assumption.
19	right now, based on what we have been using, we	19	MR. COSTA: It is, but at this
20	have been using mostly as the something	l	point, we don't have any historical records that
21	festivals.	21	show that we would exceed the parking that we're
22	On site, we have 500 capacity right	22	proposing to build. We've proposed more parking
23	now,	23	than is ever used on any day other than New
24	CHAIRMAN SWEENEY: Okay.	24	Year's.
25	MR. CHAVA: Off site, we are parking	25	So could it happen, and could we

1	need to plan for that? Yes. You know, is there	1	CHAIRMAN SWEENEY: As of today, how
2	a system we could put in place? We can work on	2	many have you utilized off-site parking?
3	that. I mean, that's	3	MR. CHAVA: January 1st. March 4th.
4	CHAIRMAN SWEENEY: I think that's	4	CHAIRMAN SWEENEY: Okay.
5	something else that you need to add to your	5	MR. CHAVA: And April 13th.
6	traffic management plan, just in case there is a	6	CHAIRMAN SWEENEY: Okay. So those
7	demand for spots that exceeds the available	7	
8	supply. Let's not respond by saying, oh, well,	8	MR. WARNER: I'm sorry, wasn't there
9	we didn't think it was going to happen. That's	9	already testimony that January 8th was a holiday
10	not go to help. All right? Let's have a plan in	10	that required off-site parking, or did it fall on
11	place beforehand.	11	a weekend?
12	MR. COSTA: That's fine.	12	MR. COSTA: That's it no, that
13	MR. CHAVA: We already have 100, 150	13	happened in December.
14	excess more than what we need. We're saying	14	MR. WARNER: Well, I know that.
15	800 to 900 is adequate for us.	15	MR. AVADHANI: No, what happened in
16	CHAIRMAN SWEENEY: Yeah, I	16	January 8th was we used
17	understand there are enough spots off site. My	17	MR. WARNER: January 8th, 2019, what
18	question is: What's the process going to be that	18	happened?
19	allows you to utilize those spots if the demand	19	MR. CHAVA: We didn't have to use
20	turns out to be greater than you expected?	20	MR. COSTA: You didn't have to use
21	Because you know when that's going to happen.	21	off-site parking on January 8th? Okay. So less
22	Right? It's going to happen on the day of the	22	attended.
23	event; it's not going to happen three days before	23	MR. WARNER: Was it a weekend or a
24	the event. How are you going to deal with that	24	weekday? Anybody with a calendar.
25	at the time of the event is my question.	25	MR. AVADHANI: It was everybody

And I don't want to speak about the COE, because we don't know about the COE, but what I do know about is the Insmed property; there's 120-room hotel that's been approved as of last week in Bedminster, next to the Bridgewater Manor, that's on the border of our township, and the mosque, which is in existence, it's being constructed. So I just want to really just hear you tell me that what are those projects put into your calculation for something? I heard a 1 percent number thrown out for a 2019 over 2020 growth factor, but were any of these existing approved construction projects put into your traffic study which you testified to today?

Is it possible that maybe that should be built, but the money that's been dedicated for that project be used to purchase a piece of property as you alluded to, that there's a lot of parking lots available, places for parking is there any property close by that, for five days a year, that you own it all 365, but you can put a parking lot on that piece of property, and just have the jitneys go for those five days? Is there a piece of property available that they could purchase for the same cost as the garage? MR. CHAVA: No, you don't have to be a member. COMMISSIONER GUTTSCHALL: You don't have a membership either? MR. AVADHANI: The way it works is people just come there, they worship, and they leave. Of course, there's a cafeteria, people go there to eat, but other than that, they come there, they worship, and they leave. It is not like "event" is the wrong word, I would say. It's more for religious purpose, that people would come, they pray to the god, and they just leave.
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	COMMISSIONER FOOSE: Sir, you sound MR. AVADHANI: The reason we do that, the reason is because I've done traffic impact studies in New York City and all, and typically, if the if the agency says 2 percent, we just go, as a safety factor, as a factor of safety, we say, okay, let's go with 3 percent. So things like that. COMMISSIONER FOOSE: Okay. MR. AVADHANI: That's the only reason. MR. WARNER: It's basically 150 percent of what some agency requires. In this case, it's the DOT requires 1 percent COMMISSIONER FOOSE: Right. MR. WARNER: 1 and a half COMMISSIONER FOOSE: So they built a buffer, and that buffer is not really subjective to the person doing the analysis. MR. AVADHANI: That's correct. It was just a number that that's how we do	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	the temple and worship and I'll let you, Rao, explain that further and then leave. It's not a a service where everyone sits. So it's it's some people come early; some people come later. Sometimes it's a beautiful day, and more people come. So that's where you get the little bit of variation. COMMISSIONER GUTTSCHALL: But you have also, you have a membership, I would imagine, and you wouldn't necessarily MR. CHAVA: No, you don't have to be a member. COMMISSIONER GUTTSCHALL: You don't have a membership either? MR. AVADHANI: The way it works is people just come there, they worship, and they leave. Of course, there's a cafeteria, people go there to eat, but other than that, they come there, they worship, and they leave. It is not like "event" is the wrong word, I would say. 4	upon consolidation	4	MR. WARNER: Thank you. And that
5	MR. WARNER: Okay. That's what you	5	gets us moving on to the waivers.
6	were referring to?	6	BY MR. COSTA:
7	MS. EHLEN: Yeah, it will disappear.	7	Q. Barbara, I'm just going to ask you
8	MR. WARNER: So if I may, we have a	8	a couple questions on the variances. If you
9	lot width; we have the FAR, floor area ratio; we	9	could just go through them just quickly, and
10	have the combined side yard setback for Lots 2	10	explain to the board which ones are caused by
11	and 5; we have minimum one side yard setback for	11	this application, and which ones are either
12	Lot 3, for Lot 2, and for Lot 5; and we have a	12	reduced or unchanged?
13	minimum front yard setback for Lot 2; and we have	13	And I think we addressed the first
14	a lot area for the entirety of the site.	14	two, minimum lot area, that variance is actually
15	MS. EHLEN: Mm-hmm.	15	reduced, because more lot area was acquired with
16	MR, WARNER: And are those all the	16	the three additional lots?
17	bulk variances, before we get into the fact that	17	FAR is slightly reduced, but I
18	some of them relate to conditions that require a	18	believe that was just a rounding correction. So
19	conditional use variance? Those are all the bulk	19	FAR was previously or is currently 0.081, and
20	variances, the C variances?	20	now it's going to be 0.077. So that was
21	MS. EHLEN: Yes, but those will all	21	reduced
22	be	22	MR. WARNER: Excuse me, if I could
23	MR. WARNER: Some of them are	23	ask you on that one, are you certain that was a
24	conditions of the use which also require you to	24	rounding error?
25	get a d(3) conditional use variance. Correct?	25	MR. COSTA: No, I'm not. I'm going
	114	١.	
1	MS. EHLEN: Yes, those are the ones	1	to MR. WARNER: Mr. Costa, might it
2	that trigger the d(3).	2	instead have been the result of increasing the
3.	MR. WARNER: The FAR is also a d(3)	3	lot area, and also increasing the floor area by
4	variance as well. Correct?	4	way of at least continuing the community center
5	MR. COSTA: Correct.	5	that is no longer proposed to be eliminated, but
6	MR. WARNER: And in addition to the	6	that the net result was you were adding that much
7	variances, you're asking for relief of	8	more in lot area, as opposed to the increase in
8	preliminary and final major site plan. Correct?	9	the floor area from the community center; that,
9	Approval. Correct?	10	proportionately, you are actually bringing the
10	MS. EHLEN: Yes. MR. COSTA: Correct, yes, and	11	floor area ratio down? Might it have been that?
11		12	MR. COSTA: It very definitely was
12	subdivision. MR. WARNER: I will get there, thank	13	that, and I was thinking of a different one that
13		14	was a rounding situation. So thank you for the
14	you. And you're also asking for	15	clarification on that. So that's also a
15	preliminary and final major subdivision approval;	16	reduction.
16	by "subdivision," I mean by way of lot	17	BY MR. COSTA:
17	consolidation or merger, as opposed to	18	Q. If we look at the setbacks, the
18 19	subdivision, but they're both, for the benefit of	19	50-foot setback requirement, and we have Lot 5,
20	the board and members of the public, when you	20	which is one of the newly acquired lots, can you
21	have a lot consolidation, it's viewed as a	21	explain why we now have a variance required for
22	subdivision, even though you're not dividing the	22	the 7.41-foot variance on that lot?
23	lots further; in fact, you're doing the reverse,	23	A. Yes. So this is an existing
24	you're consolidating or merging them.	24	condition; it's just due to the consolidation of

configuration of the parcel is actually as a 2 result of several development applications over the years. It was originally purchased by the temple in 1992, and in 1995, the temple obtained approval to construct a new -- a new -- a temple.

In 2002, the temple obtained approval to construction paved parking.

And in 2009, the temple obtained approval to expand the temple, the cultural center, and the on-site parking.

The latest approval was a result of the settlement with the community and the temple 13 over an RLUIPA claim.

The current application seeks to construct additional parking on site, as well as 16 retain the community center. As we know, 17 they're proposing to construct a two-level 18 parking deck, the first level being equal with what is currently there, and then expanding below, to a second level beneath.

The deck will only be accessible from the temple site. Separate access from 23 Cedar Brook Road will not be provided. Neither vehicular nor pedestrian access will be provided 25

122

1 from Cedar Brook Road.

As we've had extensive testimony on it before, the visual intrusion of the deck will 3 be mitigated.

First, from the existing tree lines that are proposed to remain, there is -- there will be a few isolated locations that were previously identified where the deck will be partially visible, but they will be providing plantings at those points as well.

We've also added the glass panelling, to help, kind of, diminish the impact 12 of the view of the deck.

Lighting will also have -- be appropriately scaled, and also they're proposing 15 light caps, if needed, to further shield the lighting.

And, also, not least of which, the single-family homes, which will be -- which will remain, and also help shield the deck.

20 21 The application is proposing to 22 construct the parking in response to an identified need. So outside of New Year's, we 23 understand that people are parking off site and 24 being bused in. At this point, at some -- not

everyone is waiting for that busing, so we're

having pedestrians walk along a major highway to

get to the temple, and this impediment has led

to this unsafe condition of pedestrians walking,

but also it limits people's ability to actually

get to the temple and worship. So we're

7 impinging on their religion to actually get

there and participate.

9 With the current configuration, 10 except for New Year's, people may arrive on site, go circulate looking for parking, then

Jeave. So it's creating, kind of, like, a 12

double. They come, they search, they go, and 13

14 they go park off site. In this manner, as

stated by the traffic engineer, we're hoping to 15

16 capture everyone on site throughout the majority

of the year, with the exception of New Year's. 17

18 So this circulation is causing unnecessary

19 traffic, when it can be captured on site.

So in order to accommodate the 20 proposed parking, the temple has purchased the 21

adjoining residential lots. As I'd mentioned, 22

the single-family homes on these lots will 23

remain unchanged, and be utilized as housing for

25 the clergy.

1

Before going back into the

variances, I just want to take a brief look into 2 your master plan. Looking at the 1990 master

plan, stated goals and objectives include: 4

To promote a balanced variety of

residential, recreational, public, commercial, 6 industrial, conservation land uses. The land 7

use element includes the policy of preserving 8

and maintaining the integrity of existing

residential areas, and seeks to accomplish same 10

by preventing the inclusion of incompatible 11

nonresidential land uses into residential 12

neighborhoods, and by assuring the compatibility 13

14 of adjacent land uses.

The applicant is seeking to 15 maintain the residential character of this area. 16 As I said, they are maintaining the 17 single-family homes; they are not proposing any 18

connection between Cedar Brook and the temple. 19 20 And the parking deck itself is shielded, as I said, by existing treelines, by 21 proposed landscaping, and by the residential 22 homes themselves. And if it were visible, the 23 appearance has been softened by adding glass panels, and by trying to reduce the light 25

This is the opportunity -- the opportune time to discuss the use in context with the community. While this does not necessarily -- this is not necessarily an aspect 9 of the variance test, it does put the 10 application into context.

The New Jersey legislature has 13 recognized that some uses are inherently 14 beneficial in nature and deserve special 15 treatment; thus, N.J.S.A. 40:55D-4 defines an inherently beneficial use as a use which 16 universally is considered a value to the 17 community, because the use fundamentally serves 18 the public good and promotes the general 19 welfare. There is no dispute that a use such as 20 a temple qualifies as inherently beneficial. 21 When reviewing this application, we 23 must also consider the unique nature of a use,

130

Institutional Persons Act of 2000, RLUIPA. The 2 temple is just such a use, and is protected by 3 federal law.

protections under the Religious Land Use and

24 where a religious use is also afforded

When reviewing an issue related to 5 conditional -- the conditional in the context of 6 a D variance, we actually turn to Coventry Square versus Westwood, and not Medici. The 7 issue is whether or not the law can accommodate 9 the deviation. In essence, the Coventry standard shifts the focus of the negative 10 criteria away from the impact of the use, to the 11 12 impact of the deviation. So we're not looking at the use itself; we're looking at the 13 deviation from the standards. 14

15 MR. WARNER: If I may, just for clarification, those are the conditions that make 16 17 this a conditional use, and not a non-permitted 18 use. It is a permitted use, so long as it meets certain conditions, and there are a few 19 conditions under the ordinance that it does not 20 specifically meet; it deviates from. Correct? 21 MS, EHLEN: Correct. 22

MR. WARNER: So the board is to 23 focus on those deviations, and not on the use as 24 a whole. Correct? 25

MS. EHLEN: Correct.

MR, WARNER: And then the board does 2

3 not -- you are not subject to the enhanced

4 quality of proof under the Medici case; the board 5 -- you are not required to show, on the negative

criteria, the reconciliation with why is this use

7 a -- not listed as a permitted use, you're not

8 required to show that, Correct?

MS, EHLEN: Correct.

10 A. So, in 2009, a 27.5-foot side yard 11 setback was approved, where 50 was required, for 12 an existing single-family residence on Lot 13 12.02. The residence was to remain a 14 single-family dwelling and be utilized as clergy 15 housing. For these reasons, the preexisting nature of the deviation, and the continued use of the dwelling as a home, the township granted 17 18 the variance.

The same situation applies to the 20 current application. The requested conditional 21 use variance of the setbacks associated with the 22 existing single-family homes on Lots 2, 3, and 23 5, these, as discussed, were all existing 24 conditions, and no modification to these 25 setbacks are proposed. The homes will remain as

132

1 they currently are configured, and as was established in the 1950s and '60; they will 3 continue to be used as residential homes.

As the 50-foot side yard setback is 4 5 coordinated into the township's conditional for 6 houses of worship, a D variance is required. As I said previously, these homes have existed, 8 it's just that the incorporation into the parcel owned by the house of worship that triggers the 10 need for a d(3) variance in connection with 11 these homes.

As we've also discussed, the 13 current FAR, the applicant is proposing to . reduce the previously permitted 0.081. 14

MR. WARNER: I'm sorry, before you 15 16 get to the FAR variance, if I may, did you cover all the conditions that are deviated with respect 17 18 to the d(3) conditional use variance?

19 MS. EHLEN: The d(3), yes -- well, 20 we've discussed -- the d(3) use variance is actually triggered by the minimum side yard 21 22 setbacks associated with Lots 5 -- 2, 3, and 5.
